PROFESSIONAL SUMMARY

Systems and requirements engineer with experience in automotive requirements governance, ALM consulting, software validation, and technical product leadership. Led customer implementations, traceability initiatives, and API-based automation using Jama Connect and Visure ALM. Founder of a healthcare SaaS platform, leading a team of 7 contributors through production launch and external beta testing. Combines stakeholder coordination, hands-on troubleshooting, and AI-assisted development.

PROFESSIONAL EXPERIENCE

Bookroom | Tijuana, Mexico | bookroom.mx

Founder & CEO / Product & Technology Lead | Jul 2026 - Present

- Founded a healthcare SaaS platform and lead 7 contributors across product development, operations, sales, and customer-facing activities.
- Led development through production launch; define product scope, prioritize features, assign responsibilities, and coordinate releases and team alignment.
- Coordinate external beta testing with 5 healthcare organizations and 7 beta users; translate feedback and usability issues into prioritized product improvements.
- Contribute to implementation and bug fixes through AI-assisted development across the web application and backend API, working with PostgreSQL and Redis.
- Validate scheduling, patient management, administrative, and mobile workflows; reproduce defects and coordinate fixes and release readiness.
- Prepare the team for sales through cold calling, warm outreach, discovery conversations, product positioning, and technical demo training.

Visure Solutions | Remote, USA

Requirements Manager / ALM Consultant (1-year contract) | Oct 2025 - Sep 2026

- Served as product SME and pre-sales demonstration lead, delivering 5-12 tailored walkthroughs per month focused on traceability, impact analysis, and lifecycle management.
- Led ALM consulting and onboarding for 15+ active clients, translating engineering workflows into data models, traceability structures, and governance processes.
- Created approximately 20 narrated tutorial and demo videos, averaging 3-5 minutes, plus web-based guides, practical use cases, and visual learning resources.
- Built an internal API-based automation skill using AI-assisted development to create prospect-oriented demo projects and streamline sales demo preparation.
- Performed platform administration, release testing, black-box testing, defect reporting, and functional validation; supported risk and DFMEA workflows.
- Led migrations from Excel, IBM DOORS, Jira, and ReqIF-compatible tools for 15+ clients, preserving requirements, relationships, and traceability.

PROFESSIONAL EXPERIENCE - CONTINUED

Bose Automotive / Luxshare-ICT | Tijuana, Mexico

Configuration Analyst | Dec 2024 - Oct 2025

- Governed system configuration and engineering Change Notices (CNs) in Windchill and SAP S/4HANA under CM2 principles; earned CM2 Core Certification.
- Processed 30-35 change notices per month within a 2-day turnaround cycle, reviewing engineering documents, BOMs, and mechanical and software change packages.
- Coordinated change intake, SME reviews, approval routing, and implementation documentation with project management and engineering teams.
- Established the role's operating processes, including governance, SIPOC, approval workflows, and onboarding documentation.

Bose Automotive / Luxshare-ICT | Tijuana, Mexico

Systems / Requirements Lead | Apr 2023 - Dec 2024

- Owned system-level requirements governance across 2 core automotive projects and supported 6+ additional programs using ASPICE and V-Model frameworks.
- Restored end-to-end traceability across 2 related automotive programs by comparing requirements, identifying coverage gaps, and coordinating closure through validation.
- Managed customer specification imports in Jama Connect, SME reviews, approval and rejection workflows, and requirements update tracking.
- Owned the Assumptions, Clarifications, Exceptions (ACE) process, coordinating unresolved requirements with discipline-specific SMEs and client-facing counterparts.
- Designed ASPICE-aligned dashboards with the Jama Connect API and Power BI across SYS1, SYS2, SWE1, SWE2, and test phases; replicated the framework across projects.
- Led workshops with 10+ stakeholders, delivered traceability matrices, mentored junior colleagues, and coordinated teams in Japan, Europe, and the United States.

TECHNICAL SKILLS

Core: Requirements management, systems engineering, ALM consulting, product leadership, pre-sales demonstrations, customer enablement, technical documentation.

Quality & Processes: ASPICE, V-Model, CM2 change management, ReqIF, black-box testing, defect reporting, functional validation, risk management, FMEA / DFMEA.

Tools: Visure ALM, Jama Connect, IBM DOORS, Windchill, SAP S/4HANA, Power BI, Jira, Confluence, Apptivo.

Technical: REST API integration, Python scripting, AI-assisted development, data migration, PostgreSQL and Redis (Bookroom application work).

Standards familiarity: DO-178B/C, DO-254, IEC 61508, IEC 62304, ISO 26262 / ASIL, ISO 13485, ISO 14971.

EDUCATION & CERTIFICATIONS

CM2 Core Certification | IpX | Oct 2025

Bachelor's Degree in Mechatronics Engineering | CETYS University, Tijuana | Aug 2023

Bachelor of Arts in Management | City University of Seattle | Aug 2023

LANGUAGES

Spanish: Native | English: Professional Working Proficiency (C1)
